Professional Summary

B.Tech Information Technology student with a strong foundation in C, Java, Python, and SQL, and hands-on experience building responsive web applications with HTML, CSS, JavaScript, and React. Completed a web development internship focused on reusable UI components and API integration, and built full-stack projects backed by Supabase. Seeking an entry-level software or full-stack development role to apply technical skills and keep growing.

Education

B.Tech, Information Technology | Sharda University | Graduation: 2028

Technical Skills

- **Programming Languages:** C, Java, Python
- **Web Technologies:** HTML, CSS, JavaScript, React
- **Databases:** MySQL, Supabase
- **Tools & Platforms:** VS Code, MS Word, Excel, PowerPoint
- **Soft Skills:** Analytical Thinking, Problem-Solving, Time Management, Adaptability

Internship Experience

Web Development Intern | Pace Logistics, Nepal 25 May 2026 – 6 July 2026

- Developed and maintained responsive web pages using HTML, CSS, JavaScript, and React.
- Built reusable UI components and improved usability across different screen sizes.
- Integrated frontend features with APIs to display and manage dynamic data.
- Debugged and resolved UI and functionality issues, improving site performance and reliability.
- Collaborated with team members to gather requirements, implement features, and test web applications.

Projects

24/7 Clinic Appointment Booking System | React, TypeScript, Vite, Tailwind CSS, Supabase

- Built a responsive booking platform concept for patients to find clinics and book doctor appointments online.
- Designed workflows for doctor search, appointment-slot selection, and booking management.
- Used Supabase for backend data storage and authentication; explored location-based clinic discovery.

Community Clean-Up Website | React, JavaScript, Vite, Tailwind CSS, Supabase

- Developed a website concept to support reporting dirty public areas and participation in community clean-up activities.
- Designed pages for volunteer registration, waste-management guidance, clean-up schedules, and before-and-after galleries.
- Prepared the app for Vercel deployment and configured its Supabase connection.

Hotel Management System | React, Tailwind CSS, Vite, Supabase

- Built a hotel management application with room and customer CRUD operations.
- Implemented booking workflows with checks to help prevent double-booking, plus billing and food/service order modules.
- Added authentication, protected routes, and reusable dashboard components.

Alumni Data Management System | React, Supabase

- Developed a web application for managing and searching alumni records.
- Implemented CRUD operations and search/filter functionality with Supabase-backed data storage.
- Designed a responsive interface for alumni and student record lookup.

Personal Habit Tracker | React, JavaScript

- Built a habit tracker with add, edit, delete, and daily completion features.
- Added progress tracking, streak counts, completion percentages, and local-storage persistence.
- Created a responsive interface with reusable React components.

Personal Portfolio Website | HTML, CSS, JavaScript, React

- Created a responsive portfolio to showcase technical skills, projects, and professional information.
- Organized project information in a clear layout using reusable frontend components.
